

First Thematic Workshop Primer

Innovative value-chains for biobased packaging materials, coatings, paints, varnishes and adhesives

Day 1. Environmentally friendly coatings and packaging materials with specific functional properties derived from biorefinery & biotechnological processes

Sectors involved:

- Food and drink manufacture
- Chemicals manufacture and distribution
- Plastics manufacture
- Paper manufacture
- Foil manufacture
- Packaging coatings manufacture
- Composite packaging manufacture

Day 2. Alternative aromatics from 'green' raw materials for the production of synthetic materials, chemicals and coatings like paint and adhesives

Sectors involved:

- Petrochemicals (aromatics)
- Polymer manufacture
- Resins manufacture
- Paints, varnishes and coatings manufacture
- Propellants and diluents manufacture
- Adhesives manufacture
- Adhesives downstream applications

Draft Agenda of a Workshop Day

- 09:00-10:00 Registration and refreshments
- 10:00-10:45 Introduction to advances in the Topic of the day (NTUA-led)
- 10:45-11:30 EU Innovation Funding: General structure & Specific Instruments (NTUA-led)
- 11:30-12:00 Networking time and refreshments
- 12:00-12:30 Greek industrial footprint in the Topic of the day (Industry-led)
- 12:30-13:00 EU industrial footprint in the Topic of the day (Industry-led)
- 13:00-13:30 Lunch & Networking
- 13:30-16:00 Interactive Project Conception on the Topic of the Day (NTUA-facilitated)
- 16:00-16:15 Summary of the Day (NTUA)
